

Water

Water has been here since creation of earth
And has been called mother of birth
It can start of as arctic ice
It floats into the ocean without thinking twice
Into the ocean it stays
The maximum recorded is 3,285,000 days
Then we take it for our use
Here we take care not to abuse
We should not waste
In our showers, make haste
Then it dissipates
And then evaporates
Into the sky
To the earth it says a short goodbye
Because it comes back down
Onto earths many town
And the water cycle is again repeat
But it may come down as snow or sleet.
